

#80135

## LRP Servo Noise Killer

The Servo Noise Killer - BEC Stabilising Capacitor is renamed for a better understanding.

This BEC Capacitor is a very important noise killer.

With servos continuously getting stronger with their powerful brushless motors inside, they can generate electronic noise/glitches that can pass through the receiver to the ESC and, as unbelievable as it sounds, can cause ESC damage.

To be on the safe side it is always good to plug this additional Servo Noise Killer in any free slot at the receiver.
