

GRAVIT
DARK VISION

#220712

Gravit Dark Vision 2.4GHz Quadcopter with Full-HD-Action-Cam

Colour your Gravit!

Meet our latest quadcopter offspring. The LRP Gravit Dark Vision is equipped with the revolutionary quick mounting system. It works plug'n'play. You won't need any screws or soldering. Simply pull the boom of the Gravit from its retainer and push the optional coloured replacement arm in and you are good to go. The arms including motor and propeller will be separately available in 4 cool colours: yellow, red, blue and green.

The Dark Vision is also equipped with a with a Full-HD camera that can be operated from the transmitter. Pictures and videos can be shot via the two buttons on the transmitter. The files are directly saved to the included 4GB Micro-SD card. You can stay up in the air for up to 14 minutes with the included LiPo battery.

All the well-known features from our previous quadcopters are also on board. "Headless Flying" and the "Return Functions" make your life as a pilot a lot easier while the high-power motors generate ultimate acceleration and speed – in combination with the "360° Automatic Looping" a true eye catcher! The "Multiple LED-System" with different colours provide you with all the information you need and also makes it very tough to loose sight of the Dark Vision.

FEATURES

- Revolutionary quick-mounting-system
- Full-HD-Action-Cam
