## Med In The leem...

JCONCEPTS UNVEILS THE LATEST ALUMINUM SHOCK PARTS FOR THE TEAM ASSOCIATED SHOCKS.

JCONCEPTS NEW RELEASE
TRIPLE DEES & LIL CHASERS 1/8TH BUGGY TIRES

JCONCEPTS RELEASES A RC8B3 | RC8B3E FIN TITANIUM TURNBUCKLE SET AND WRENCH

The seventh generation of the Ford F-Series is distinguished by its squarer look, sharper lines and flatter panels, the trucks were designed with the working man in mind. The "Blue Oval," a trademark of all Ford pickups, makes a striking appearance centered in the grille. The F-150 Scaler body drops on the Ascender and Axial 12.50" wheelbase setting, with standard body mounts. Overall body length measures 19.75".

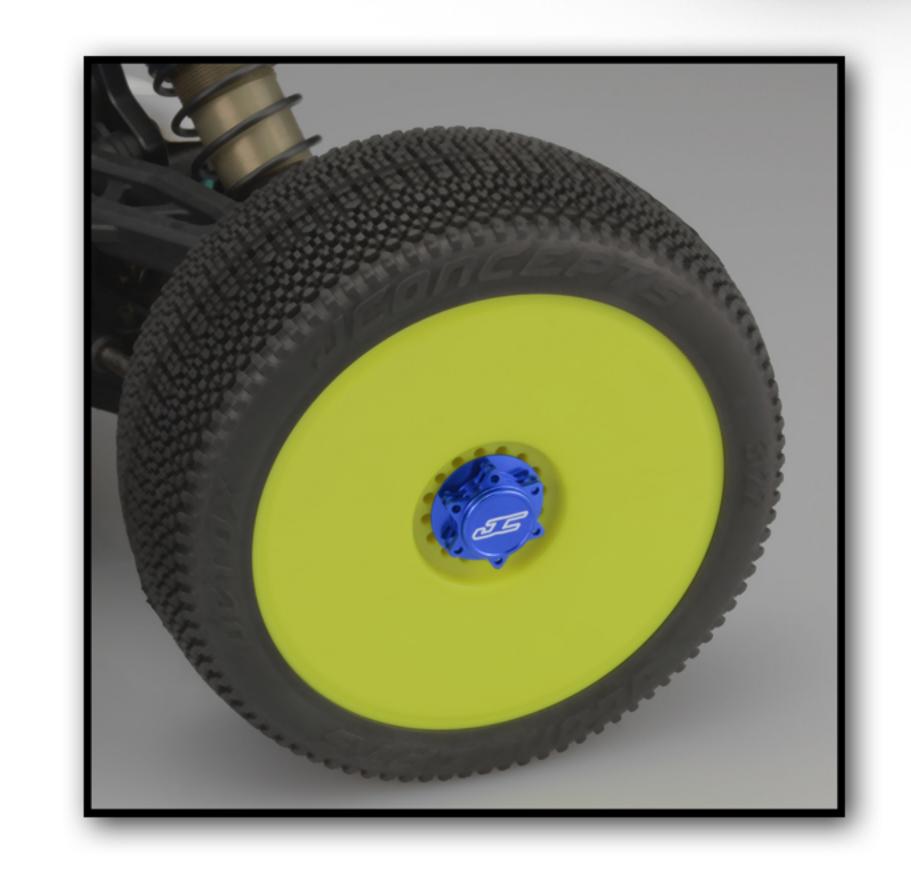

The look of the Ford F-150 is unmistakable contemporary Built Ford Tough, with bulging wheel arches, a drop-down beltline at the front doors, and some of the biggest snarling grille nostrils ever seen on an truck. This F-150 body is specifically built for the Vaterra Ascender and Axial chassis providing even more versatility to the wildly successful platforms.

Fin, 1/8th serrated light-weight wheel nut Blue (4pc) # 2451-1 Black (4pc) # 2451-2

When competitive racing hits the boiling point, everyone reaches for light-weight items. JConcepts has the answer with the introduction of the Fin styled light-weight 17mm fine thread wheel nut set.

JConcepts unveils the latest aluminum shock parts for the Team Associated shocks. Available in blue or black anodized colors.

TLR 22 3.0, Aero rear wing # 0154

## NEW 1/8 BUGGY TIRES

#### **TRIPLE DEES 1/8TH BUGGY TIRES**

Double is great, Triple is amazing. The Double Dees, originally designed in 2007 were ahead of their time. Now the Triple Dees, designed in the future and available now represent the latest in grip from JConcepts. Loose and tacky track conditions require small pin designs and the Triple Dees were a fresh design from the ground-up. Starting with finely spaced square mini lugs, the JConcepts design team spent considerable time proofing this design. Center bar structure is important for wear characteristics and an overlapping and blended center bar was created.

Blue compound #3132-01 | Green compound # 3132-02 | Black compound #3132-07

#### LIL CHASERS 1/8TH BUGGY TIRES

The LiL Chasers rely on tread scaled down from the original Chasers. Small, rectangular lugs which are angular in multiple directions give the tire the ultimate bite for outdoor racing. LiL Chasers have a lower, closer lug arrangement which gives incredible responsiveness and bites in medium, high and low grip conditions. The wet and dry condition tire has small recessed cuts in the top of the tread for extra edges and increased formability over terrain. The center overlapping bar treatment increases durability in the highest wear region of the tire.

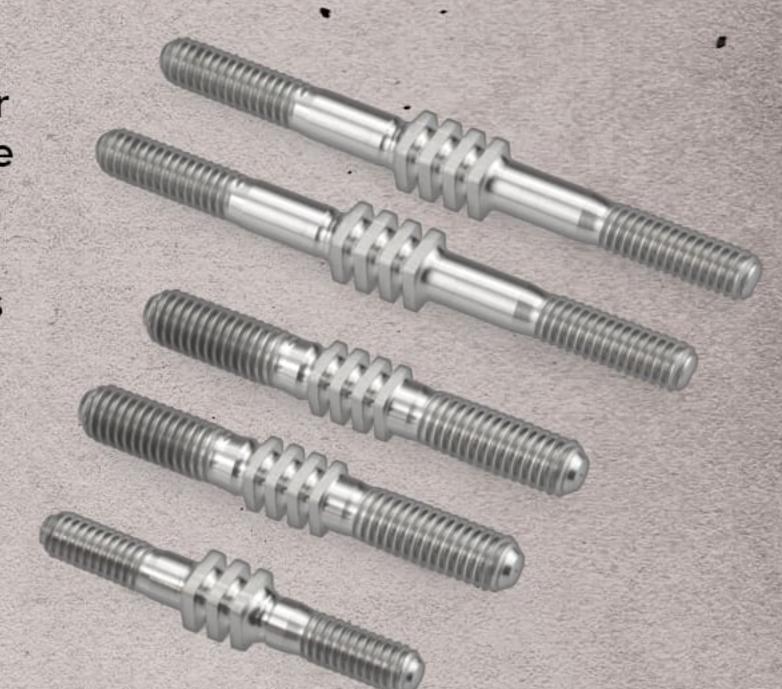

Blue compound #3129-01 | Green compound # 3129-02 | Black compound #3129-07

## FIN TITANIUM TURNBUCKLES

#### RC8B3 | RC8B3E FIN TITANIUM TURNBUCKLE SET - 5PC.

The Fin turnbuckles are lightweight and the original design brings out the glamour and quality that makes titanium one of the most sought after exotic materials in the world. The JConcepts turnbuckles are produced with left and right hand threads with the left being conveniently marked for easy orientation.

Fits – Team Associated RC8B3 | RC8B3e #2507

#### FIN 1/8TH TURNBUCKLE WRENCH

An aftermarket adjustment wrench offered by JConcepts is available separately for ease of adjustment on JConcepts 5mm turnbuckles. The wrench

is made of aluminum material and features a stout adjustment and handle area for handy pitting.

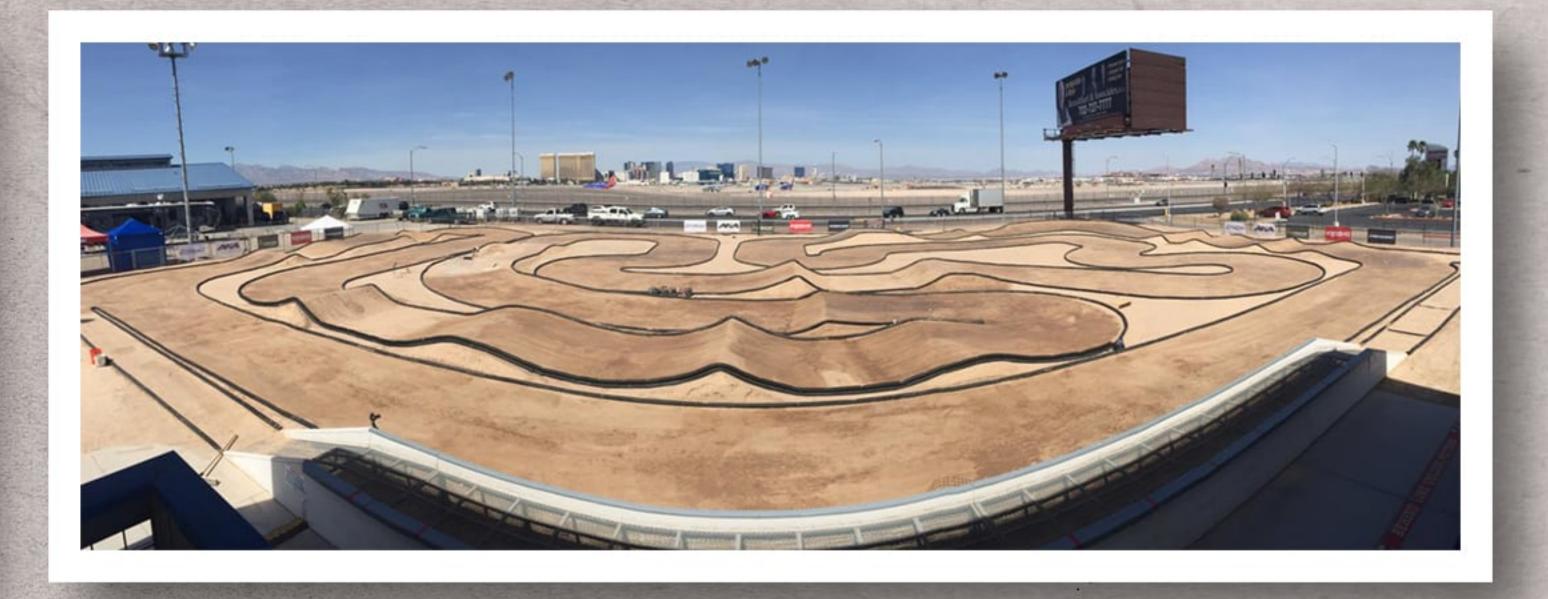

The wrench is sized to fit just about anywhere in a racers toolbox and is the quick hit accessory for racers utilizing the new Fin turnbuckles by JConcepts.

5mm open end #2508

### 2016 SILVER STATE

The 2016 Silver State took place at RC Tracks of Las Vegas, the site of the 2016 IFMAR World Championships. The race was packed with entries looking for a taste of what the World Championships will have in store later in the year. A great layout that was smooth, seal-coated clay greeted drivers for this years event. JConcepts was well represented and the conditions proved tricky for everyone.

Spencer Rivkin dominated qualifying in the 1/8th Pro buggy class with JConcepts and Team Associated. The Arizona ace driver TO'd rounds 1 and 3 on a way to the impressive qualifying effort. JConcepts driver Cole Ogden would bump into the 1/8th Pro Buggy A-main with his new JConcepts equipped Mugen buggy.

In the 45 minute A Main, Ryan Maifield came out swinging with his JConcepts equipped 8IGHT 4.0 taking the win, Spencer would end up in 2nd place. The JConcepts Detox tires and Silencer bodies proved tough to beat in the hot Vegas weather.

Everyone was impressed with the RC Tracks facility and look forward to returning in early October for the IFMAR World Championships.
