A.I. Super Reverse Digital

The artificial intelligence of LRP: The A.I. Automatic Reverse digital speed control line!

Do you want to setup the speed control or do you want to drive your RC car? These words are mostly becoming reality, if a driver wants to setup his speedo quickly and have fun with his RC car.

The new LRP A.I. Automatic speed control line stops this unloved scenario! No button, no setup = NO PROBLEM — just plug-in and play! LRP electronic now adds yet another technological milestone to its highly successful speed control line. The innovative LRP True Automatic combines the performance of the LRP speed control with the comfort of an automatic function, adapted specially to needs of RC novices. Never has it been easier to use a professional speed control, never before have you had more time to concentrate on the actual task of driving. With the A.I. speed control line, the LRP engineers developed a completely new speedo generation with built-in artificial intelligence. These features come true in the product name: A.I.! LRP Automatic: With LRP's exclusive true Automatic technology, a push button setup is completely unnecessary: Just plug-in the speedo and drive! The speed control immediately "learns" the individual transmitter setting and is perfectly set-up for every run with the correct neutral-, full speed forward- and full speed reverse transmitter settings. Whatever your car's configuration is, the LRP True Automatic adapts to it and determines your perfect setup.

Fail Safe: Built in Fail Safe: What is Fail Safe? Another technological highlight is the factory built in Fail Safe System. "The guardian angel" of your RC car. The Fail Safe System continuously monitors the radio signals being sent to your RC car. If incomplete or "false" signals are received as a result of low batteries or radio frequency interference, your LRP A.I. Automatic Super Reverse speed control reacts instantly and shuts off your model to protect it against damage due to interference.

LRP A.I. Super reverse digital: The LRP A.I. Automatic Super Reverse digital is the entry level model of the new line with all the great A.I. features. Never before, LRP offers such a powerful forward/brake/reverse speed control (over 13 turns) with extra low pricing! Check out the price at your local hobby shop!

FEATURES

- LRP's exclusive A.I. Automatic Setup
- 100% digital
- Fail Safe System
- Limited Lifetime Warranty
- Multi-Protection-System
- Plug-in-and-Drive
- Forward/Reverse speed control
- 25 years warranty

- 3x Multi Protection System
- 4, 5 and 6 cells

TECHNISCHE DATEN

- Typical voltage drop @20A 0.160V
- Rated current 120A
- Voltage input 4-7 cells (4.8-8.4V)
- Size 42.5 x 42.5mm
- Weight 47.5g
- BEC / Electric power supply of the receiver 5.0V
- Set-up Procedure automatic
- Motorlimit over 13 turns
- Connectors Standard Tamiya Style
- Forward/Brake/Reverse Yes
- High frequency Yes
- Fail Safe System Yes
- Multi-Protection-System Yes
