P5-HV Real Shorty LCG GRAPHENE 4200mAh Hardcase Battery - 7.6V LiPo - 120C/60C

Maximum power in the LCG shorty format

The Competition Car Line battery from last year was successful around the world in many competition classes. At the same time, they have gained high level of acceptance and appreciation amongst the scene's best drivers – LRP batteries were the most used brand and at the EFRA 1:8 eBuggy EC two thirds of the A-finalists did use the blue energy.

The latest generation battery technology gets a new boost. The **HV-LiPo Graphene cells** offer even more power than before. They can be charged up to 8.7V without problem.

The again improved cell chemistry generates an extremely low internal resistance and therefore less heat buildup under load. The so called **HDS-7 cell chemistry** guarantees maximum performance over the complete race time.

The **P5-HV technology** with 5mm gold connectors and 7.6 (2S) technology underline the extremely high technical sophistication ... just as the **Ultra LCG type** for a perfect center of gravity and even higher corner speeds.

P5-HV Real Shorty LCG GRAPHENE 4200mAh means:

- = Maximum power in the LCG shorty format
- = Less height and weight than regular shorty

The complete **Competition Car Battery Line** you can see [HERE!](#)

FEATURES

- NEW P5-HV Technology - New 5mm gold plated battery plugs and 7.6V (2S) technology for maximum power
- HV-LiPo GRAPHENE cells - New, high power LiPo cells that can be charged up to 8.70V (2S)! Maximum Power!
- 100% compatible for 8.40V (2S) charging - More Power than our 2016 batteries at 8.40V charging!
- Improved Lifetime - Highly improved lifetime when charged to 8.40V (2S) only!
- IFMAR World Champion Batteries
- LCG - Low Center of Gravity: Lower CG and lighter cells result in higher cornering speed and faster reactions on steering inputs
- NEW HDS-7 Chemistry - Improved chemistry for low internal resistance + less heat build-up under load = Maximum power until the end of your run
- FREE 5mm Gold Works Team connectors included
- 3C Charge current: Safe and fast recharge
- Charge with your standard LiPo charger. No special charger required.

- Complying with the rules of the following federations and race series: IFMAR, EFRA, ROAR, JMRCA, BRCA, DMC, and more
- 120C/60C LiPo Power. No memory effect, extremely long lifetime.
- Durable, see-through, hardcase made of high-quality synthetic material
- 2mm gold coated balancing connector
- LRP quality approved

TECHNISCHE DATEN

- Length 96.0mm
- Width 47.0mm
- Height 22.5mm
- Weight 188g
- Capacity 4200mAh
- Nominal voltage 7.6V
- C-rate 120C/60C
- Style Real Shorty LCG
- Power connector P5 5mm Gold
- Balancing connector 2mm Gold
- Charge current 3C
- Application 1:10 Offroad 2WD/4WD Modified
