SPX Brushless Bullet Reverse

The perfect all-rounders on highest level

The all new SPX speedos are the perfect all-rounders on the highest level. Never before has a speed control been so versatile and unbeatable when it comes to value for money in r/c racing: brushless and brushed motors can be run with full power in forward and reverse! It is actually 4 speed controls on 1!

The LRP SPX speed controls are constantly communicating with the motor. The result is a high precision and intelligent Motor Management System with ultra precise throttle control, linear drive feel and a fully adaptive software.

This feature records the maximum internal component temperature in the speed control during the race and can be read out at the end of the run.

Advantages: Through the maximum internal operating temperature you know the capacity utilisation of the speed control. Then you can push your R/C car right up to its maximum power limits (stronger motor, gear ratio, % full throttle, etc.).

FEATURES

- Brushless + Brushed: Forward/Brake/Reverse + Forward/Brake
- 3x Multi Protection System
- Fan on/off via speed control main switch
- Low-profile heat sink
- Voltage Input: 4.8 - 7.4V
- AutoCell System - Automatic NiMH-LiPo adaption
- Ice Drive Design
- Big power capacitor optimised for Touring car application
- Advanced digital with 4 adjustable modes
- Internal-Temp-Check System
- Automatic brushless/brushed swichtover
- German Technology

TECHNISCHE DATEN

- Motorlimit over 3.0T (Brushless) / over 4.0 (Brushed)
- Weight 45.0g
