X22 Modified 12.5mm WorksTeam rotor

The new rotor line for X22 Modified motors will help you tune and maintain the performance of your X22 motor to the maximum. Together with LRP's racing team the new rotors have been put to the tough tests at competitions around the world.

As a result new modified rotors have been released with specific improvements to raise the performance and reliability. The diameter range has been extended now to five versions from 12.1mm - 13.0mm to provide tuning options for every situation.

A new precision balanced magnet with LRP's very own black shaft will ensure highest efficiency and power of your X22 Modified motor every single time.

FEATURES

- LRP's own shaft preparation for ultra consistent performance
- Selected magnet material for highest temperature stability with consistent RPM and brake feel
- Dual axis balanced rotor with blue anodized balancing rings for reliability and smoothest operation under high RPM
- 1.2mm longer mounting surface for easy pinion mounting

TECHNISCHE DATEN

- material Sintered neodymium, premium grade
- Length 24.0mm
- Inner diameter 5.0mm
- Diameter 12.5mm
- Type X22 Modified
- Coating Nickel
- Shaft reinforced steel, black
